**TERESONIC® IS NAMED INNOVATIONS 2007 DESIGN AND ENGINEERING
AWARD HONOREE**

New York, New York, November 8, 2006 – The Consumer Electronics Association (CEA®) today announced Teresonic LLC as an International CES Innovations 2007 Design and Engineering Awards Honoree for Integrum© JL at the International CES New York Press Preview. Products entered in this prestigious program are judged by a preeminent panel of independent industrial designers, engineers and members of the trade press to honor outstanding design and engineering in cutting edge consumer electronics products.

Teresonic's new Integrum© Jazz Legends, limited edition loudspeakers are capable of producing remarkable levels of the highest quality sound with only a few Watts per channel. This edition is limited to only ten (10) pairs. Each pair is dedicated to one of the jazz legends and is absolutely unique. Each pair is carefully handcrafted with an original artwork – representing the ten greatest jazz musicians: Louis Armstrong, Dizzy Gillespie, Ray Charles, Benny Goodman, Miles Davis, Billie Holiday, Duke Ellington, Charlie Parker, Ella Fitzgerald, and Sarah Vaughan.

The unique musical instrument-like acoustic design of Teresonic speakers establishes a new standard for natural, exceptionally detailed sound, and stereo imaging that was not previously available in this price range. Teresonic speakers follow this design rule of Nature with one-way design, using full range high-efficiency Lowther

drivers. There are no crossovers of any kind, resulting in natural sound with a wealth of detail, exceptional dynamic range and a sense of musical “aliveness” that you’ll seldom hear elsewhere. Form follows function and Teresonic enclosures are sculptured like the finest musical instruments. The front face is magnificent rosewood, while the sides are black lacquer with beautiful artwork representing jazz musicians.

“We are thrilled that Integrum JL received the prestigious Innovations 2007 honoree award,” said Mike Zivkovic, President of Teresonic. “Our customers tell us that listening to Teresonic speakers is truly a sublime experience. The Jazz Legends edition is pushing the sonic qualities even further, and adds stunning artwork representing some of the greatest jazz musicians of all times. This combination of unique sound quality and design will win admiring glances in any setting.”

As a widely renowned consumer technology awards program that began in 1989, the prestigious Innovations Design and Engineering Awards recognize achievements in product design and engineering. It is sponsored by CEA, the producer of the International CES, the world’s largest consumer technology tradeshow, and endorsed by the Industrial Designers Society of America (IDSA), the voice of industrial design, committed to advancing the profession through education, information, community and advocacy.

Teresonic’s Integrum JL loudspeakers will be displayed in the Teresonic booth (booth # 30-234) the 2007 International CES in the Venetian Tower. CES runs January 8-11, 2007 in Las Vegas, Nevada. High-Performance Audio (HPA) Innovations Honorees will also be exhibited in The Venetian on the third floor, across from the San Polo Ballroom. Best of Innovations honoree products will also displayed at the Grand Lobby of Las Vegas Convention Center, next to Experience CEA, and at CES Unveiled: The Official Press Event of the International CES. Visit www.CESweb.org/innovations for details on Innovations 2007 Design and Engineering Honorees.

Products chosen as an Innovations honoree reflect innovative design and engineering and are judged based on the following criteria:

- Engineering qualities of the product, including technical specifications and materials used
- The product’s intended use/function and user value
- Aesthetic and design qualities (using visuals provided)
- Unique and novel features
- Contributions to consumers’ quality of life

Innovations honoree products are featured on www.CESweb.org/Innovations, where you can see a list of product categories, as well as each product name, manufacturer information, designer, description, photo and URL.
